

Industrial Gigabit PoE+ Splitter

DC 12V / 24V 25W Output
Conversion efficiency≥90%
UTP7201GE-PD25

1 Switch for different output voltages

Adopt code switch to adjust output voltage(12V/24V), can compatible with more equipments, such as IP camera(12V)/ AIO machine, PTZ camera(24V).

2 2 type of DC output ports

2 kinds DC output connectors alternative, convenient for users to choose freely.

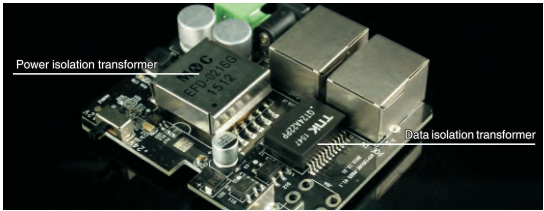

3 Operate in Complex Environment

Level 3 ESD & Surge Protection;
Operation Temperature: -40℃~ + 75℃;
Able to operate in most location.

4 Double isolation for better security

Signal and power isolate separately, avoid the risk of signal interference and electric equipment burn out which caused by non-isolation.

5 RJ45 ports with flattened pins

PoE+ high-current transmission adpot flat pin, effective contact area increases 5 times, that ensure PoE 7200mA high-current power transmission.
