8 Ports Managed Switch

- Powerful L2 and L2+ Features.
- Green and Fan-less Design.
- Intelligent Resilient Framework 2 (IRF2).

System Overview

Dahua AS4300 Switch Series are Gigabit Ethernet switches specially made for small to medium-sized businesses. These high performance switches provide wide access for devices, and offers security control and enhanced network manageability. It is ideal for use in internet cafes, hotels, schools and other similar scenarios.

Functions

Intelligent Resilient Framework 2 (IRF2)
IRF2 is the stacking technology used in conjunction with the spare ports on the panel. It offers the flexibility to stack over longer distances, such as hundreds of meters across buildings or several kilometers between sites, using long-range transceivers.

Green and Fan-less Design
With its energy saving design, power consumption and fault points are greatly reduced. It also has a fan-less hardware design and operates silently, helping to produce a comfortable environment.

Powerful L2 and L2+ Features
This series supports a large range of L2 features such as 802.1Q VLAN, Port Mirroring, STP/RSTP/MSTP, Link Aggregation Control Protocol and the 802.3x Flow Control function. It also supports L2+ feature-static routing, which is a simple way to segment the network with internal routing through the switch. This helps the system manage network traffic more efficiently.

Scene

It can meet the needs of digital transformation and security transmission, and is ideal for small and medium-sized enterprises, chain businesses, branches, the government, schools and hotels.
