

AS610

Outdoor siren with single amber beacon, polycarbonate cover

Application

The AS600 series is a range of high quality installer-friendly sirens with a sound output of 120 dB @ 1 m, that meets today's security and environmental requirements. The sirens are housed in attractive covers made from UV-proof and impact resistant 3.5 mm polycarbonate. They have a foam-resistant steel inner cover for the ultimate protection and offer a choice of strobe colours.

Dettagli

- Attractively shaped housings
- High-quality dual skinned design
